

Data Ethics and Accessibility - ensuring a human centred approach.

6- 7 November 2025, Rīga

Join us for the **third Transnational Workshop of the DO Impact Capacity Building Programme for Social Enabling Organisations**: a two-day event dedicated to exploring data ethics and its practical application in the social economy!

On the **first day**, we will set the stage with an introduction to the **fundamentals of data ethics and personal data protection** for social economy support organisations. The afternoon will continue with a practical workshop connecting theory to daily work, followed by a networking session where participants will share their own experiences, challenges, and updates on data ethics in an interactive peer-learning format.

The **second day** will dive deeper into the **practical side of regulation and ethics**. We will explore how GDPR, the AI Act, and related frameworks apply in the social economy, with a focus on human-centred approaches and responsible data management. The day will also feature a session based on a **practical guide to implementing AI safely and ethically**, equipping participants with tools and examples to strengthen their organisations' data practices.

Agenda: Location: **HOTEL BERGS, Elizabetes street 83/85, Riga**

Day 1: 6/11/2025 (11.00-17.30 pm)

Participants

The Capacity Building is open specifically to **Social Economy Enabling Organisations**, meaning entities that support and promote the development and functioning of the Proximity and Social Economy ecosystem by managing a network of social economy organisations (such as cooperatives, mutual benefit societies, associations, foundations, and social enterprises), creating networking opportunities, providing direct support to them, etc. These organisations have an important role in driving the digital transformation/transition of SMEs/entities working in the social economy sector.

This project is funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or EISMEA. Neither the European Union nor the granting authority can be held responsible for them.
